## **Independent Auditor's Report**

**To the shareholders of GMO-Z.com Cryptonomics (Thailand) Company Limited**

### **Opinion**

I have audited the accompanying financial statements of GMO-Z.com Cryptonomics (Thailand) Company Limited ("the Company"), which comprise the statement of financial position as at 31 December 2024, the statements of comprehensive income, statement of changes in shareholders' equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policies information.

In my opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2024 and its financial performance and its cash flows for the year then ended in accordance with the Thai Financial Reporting Standard.

### **Basis for Opinion**

I conducted my audit in accordance with Thai Standards on Auditing. My responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Profession (Code of Ethics for professional Accountants) that are relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with the Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

### **Material Uncertainty Related to Going Concern**

I draw attention to note to financial statements No.3, for the year ended 31 December 2024, the Company incurred a net loss for the year amounting to Baht 102.77 million, deficit of Baht 508.39 million and current liabilities in excess of the current assets amounting to Baht 31.04 million, most such current liabilities consist of short-term loans from related party. Such circumstances indicate the existence of a material uncertainty which may cast significant doubt about the Company's ability to continue as a going concern. However, the Company's management believes that the preparation of the financial statements on a going concern basis is appropriate because GMO Internet, Inc. intends to provide the necessary level of financial support and management is implementing strategic operational plan to enable the Company to continue its operations and to meet its liabilities as they fall due at least 12 months from the end of the reporting period. Hereby, my opinion is not modified in respect of this matter.

### **Emphasis of Matter**

I draw attention to note to financial statements No. 25, which explains the reclassification to the statement of financial position as at 31 December 2023 as presented herein for comparative purposes has been reclassified for the presentation in accordance with the circular letter from the Securities and Exchange Commission No. GorLorTor.SorNor.(Wor) 79/2567 Re: the guidelines for presenting customer assets, including cash deposits and digital assets in the financial statements of digital asset business operators. The effects to a decrease of Baht 3.11 million in cash and cash equivalents, a decrease of Baht 21.95 million in digital assets, and a decrease of Baht 25.06 million in custodial funds and digital assets due to customers. Hereby, my opinion is not modified in respect of this matter.

### **Responsibilities of Management for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Thai Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

### **Auditor's Responsibilities for the Audit of the Financial Statements**

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

## Notes to the financial statements

For the year ended 31 December 2024

These notes form an integral part of the financial statements.

The financial statements issued for Thai statutory and regulatory reporting purposes are prepared in the Thai language. These English language financial statements have been prepared from the Thai language statutory financial statements and were approved and authorised for issue by the Directors of the Company on 31 March 2025.

### 1 General information

GMO-Z.com Cryptonomics (Thailand) Company Limited (the “Company”) is incorporated in Thailand and has its registered office at 1, Fortune Town Building, 22<sup>nd</sup> floor, Ratchadapisek Road, Din Dang Sub-district, Din-Dang District, Bangkok.

The Company’s ultimate parent company and parent company during the financial year were GMO Internet Group, Inc. (49.00% of shareholding), incorporated in Japan and GMO-Z Com Holdings (Thailand) Company Limited (50.92% of shareholding), incorporated in Thailand.

The principal activities of the Company are digital assets business operators. The Company has been approved as a digital assets business operator by the Securities and Exchange Commission for cryptocurrency and digital token broker and cryptocurrency and digital token exchange center.

### 2 Basis of preparation of the financial statements

#### 2.1 Statement of compliance

The financial statements are prepared in accordance with Thai Financial Reporting Standards (“TFRS”), guidelines promulgated by the Federation of Accounting Professions (TFAC); and applicable rules and regulations of the Thai Securities and Exchange Commission.

#### ***Financial reporting standards that became effective in the current period***

The revised financial reporting standards, which are effective for annual accounting periods beginning on or after 1 January 2024 do not have any significant impact on the Company financial statements.

#### ***Financial reporting standards that will become effective for fiscal years beginning on or after 1 January 2025***

The Federation of Accounting Professions issued a number of revised financial reporting standards, which are effective for fiscal years beginning on or after 1 January 2025. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards clarifying accounting treatment and providing accounting guidance for users of the standards.

The Company management is currently assessing the impact on the financial statements of these revised financial reporting standards.

**GMO-Z.com Cryptonomics (Thailand) Company Limited**

**Notes to the financial statements**

**For the year ended 31 December 2024**

**2.2 Basis of measurement**

The financial statements have been prepared on the historical cost basis except for the following items.

<i>Items</i>	<i>Measurement bases</i>
Digital assets	Fair value revaluation
Defined benefit liability	Present value of the defined benefit obligation

**2.3 Functional and presentation currency**

The financial statements are presented in Thai Baht, which is the Company’s functional currency.

All financial information are presented in Thai Baht in the notes to the financial statements unless otherwise stated.

The financial statements in English language have been translated from the Thai language financial statements. In the event of any conflict or different interpretation in the two languages, the Thai version of the financial statements, in accordance with Thai laws will prevail.

**2.4 Use of judgements and estimates**

The preparation of financial statements in conformity with TFRS requires management to make judgements, estimates and assumptions that affect the application of the Company’s accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

**2.4.1 Judgements**

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

Note 4.8	Leases: <ul style="list-style-type: none"><li>- whether an arrangement contains a lease;</li><li>- whether the Company is reasonably certain to exercise extension options;</li><li>- whether the Company exercise termination options;</li><li>- whether the Company has transferred substantially all the risks and rewards incidental to the ownership of the assets to lessees or sub-lessees.</li></ul>
----------	--

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### 2.4.2 Assumptions and estimation uncertainties

Information about assumption and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts in the financial statements are included in the following notes:

Note 4.6, 4.7 and 4.8	Estimation useful life of assets;
Note 4.8	Determining the incremental borrowing rate to measure lease liabilities;
Note 4.9	Measurement of ECL allowance for account receivables;
Note 4.11	Measurement of defined benefit obligations: key actuarial assumptions;
Note 4.13	Determining the fair value of financial instruments on the basis of significant unobservable inputs;
Note 4.17	Recognition of deferred tax assets: availability of future taxable profit against which deductible temporary differences and tax losses carried forward can be utilized.

### 3 Use of going concern basis of accounting

For the year ended 31 December 2024, the Company incurred a net loss for the year amounting to Baht 102.77 million, deficit of Baht 508.39 million, and current liabilities in excess of the current assets amounting to Baht 31.04 million, most such current liabilities consist of short-term loans from related party. Such circumstances indicate the existence of a material uncertainty which may cast significant doubt about the Company's ability to continue as a going concern. However, the Company's management believes that the preparation of the financial statements on a going concern basis is appropriate because GMO Internet, Inc., the major shareholder as disclosed in Note 26, intends to provide the necessary level of financial support and management is implementing strategic operational plan to enable the Company to continue its operations and to meet its liabilities as they fall due at least 12 months from the end of the reporting period. Accordingly, the financial statements do not include any adjustments relating to the recoverability and classifications of recorded assets amounts or to amounts and classifications of liabilities that may be necessary if the Company is unable to continue as a going concern.

### 4 Material accounting policies information

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

#### 4.1 Foreign currencies

##### *Foreign currency transactions*

Transactions in foreign currencies are translated to the respective functional currencies of Company entities at exchange rates at the dates of the transactions.

Monetary assets and liabilities at the reporting date denominated in foreign currencies are translated to Thai Baht at the exchange rate at the date.

Non-monetary assets and liabilities measured at cost in foreign currencies are translated to the functional currency at the exchange rates at the dates of the transactions.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

Foreign currency differences are generally recognised as profit or loss.

### 4.2 *Financial instruments*

#### 4.2.1. *Recognition and initial measurement*

Trade receivables, debt securities issued and trade payables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset and financial liability (unless it is a trade receivable without a significant financing component or measured at FVTPL) is initially measured at fair value plus transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price. A financial asset and a financial liability measured at FVTPL are initially recognised at fair value.

#### 4.2.2. *Classification and subsequent measurement*

##### *Financial assets - classification*

On initial recognition, a financial asset is classified as measured at: amortised cost; fair value to other comprehensive income (FVOCI); or fair value to profit or loss (FVTPL).

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified prospectively from the reclassification date.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cashflows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### *Financial assets - business model assessment*

The Company makes an assessment of the objective of a business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated - e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

### *Financial assets - assessment whether contractual cash flows are solely payments of principal and interest*

For the purposes of this assessment,

'principal' is defined as the fair value of the financial asset on initial recognition.

'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

## GMO-Z.com Cryptonomics (Thailand) Company Limited

### Notes to the financial statements

For the year ended 31 December 2024

#### *Financial assets - subsequent measurement and gains and losses*

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

#### *Financial liabilities - classification, subsequent measurement and gains and losses*

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

#### *Derecognition*

##### *Financial assets*

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

##### *Financial liabilities*

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### *Offsetting*

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

### **4.3 Cash and cash equivalents**

Cash and cash equivalents in the statements of cash flows comprise cash balances, call deposits and highly liquid short-term investments, including restricted deposits at financial institution and customer custodial funds which separated from the Company's accounts and with restriction.

### **4.4 Trade and other current receivables**

A receivable is recognised when the Company has an unconditional right to receive consideration. If revenue has been recognised before the Company has an unconditional right to receive consideration, the amount is presented as a contract asset.

A receivable is measured at transaction price less allowance for expected credit loss which is determined based on an analysis of payment histories and future expectations of customer payments. Bad debts are written off when incurred (if any).

### **4.5 Digital assets**

The Financial Reporting Standards and accounting guidance regarding digital asset are still evolving. The Company has considered and evaluated digital asset transactions from core operation as cryptocurrency and digital token broker and cryptocurrency and digital token exchange center. According to current Financial Reporting Standards interpretation and the Agenda Decisions, June 2019 by the IFRS Interpretations Committee, the Company recognized the digital assets as follows;

- accounted for under TAS38 Intangible Assets, as an intangible asset with an indefinite useful life, initially measured at cost, deemed to be the fair value upon receipt, and subsequently measured under the revaluation model.

#### *Revaluation model*

Revaluation value is fair value at the revaluation date less impairment losses (no amortisation is provided on digital assets with an indefinite useful life). The fair value of digital assets using the closing rate (in US Dollar) of the day from trustworthy central website, and calculated weighted-average price from various sources and translated to Thai Baht at the foreign exchange rates ruling by Bank of Thailand at the same date.

Increase in the digital assets' carrying amount is recognised in other comprehensive income and presented under "Gain on revaluation of digital assets" accumulated other comprehensive income in other components of equity (except, in case of the increases are recognised in profit or loss to the extent that it reverses a revaluation decrease of digital assets previously recognised in profit or loss.) A decrease in value is recognised in profit or loss to the extent it exceeds an increase previously recognised in other comprehensive income. Upon disposal of a revalued digital asset, any related gain on revaluation of digital assets is transferred directly to retained earnings and is not taken into account in calculating the gain or loss on disposal.

## **GMO-Z.com Cryptonomics (Thailand) Company Limited**

### **Notes to the financial statements**

#### **For the year ended 31 December 2024**

The fair value measurement is categorised as level 2 in the fair value hierarchy.

The presentation of customer's digital assets transaction is in accordance with the circular letter from the Securities and Exchange Commission No. GorLorTor.SorNor.(Wor) 79/2567 Re: the guidelines for presenting customer assets, including cash deposits and digital assets, in the financial statements of digital asset business operators. These guidelines in preparing the financial statements is related to customer assets transactions at digital asset business operators. This required the presentation specifically only for the portion of digital assets of the Company.

The Company accounted the portion of digital assets as prepayment included under other current receivables in statement of financial position, for the digital assets which hold for system testing and transaction fee on blockchain. Prepayment is measured at cost.

Therefore, the Company will re-evaluate the accounting policy for digital assets regularly and adjust if appropriate when the new financial reporting standards and accounting guidance have been announced or changed in the Company's business practice.

#### **4.6 Leasehold improvement and equipment**

##### *Recognition and measurement*

##### *Owned assets*

Leasehold improvement and equipment are stated at cost less accumulated depreciation and impairment losses (if any).

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of leasehold improvement and equipment have different useful lives, they are accounted for as separate items (major components) of leasehold improvement and equipment.

Any gains and losses on disposal of item of leasehold improvement and equipment are determined by comparing the proceeds from disposal with the carrying amount of leasehold improvement and equipment, and are recognised as profit or loss.

**GMO-Z.com Cryptonomics (Thailand) Company Limited**

**Notes to the financial statements**

**For the year ended 31 December 2024**

*Subsequent costs*

The cost of replacing a part of an item of leasehold improvement and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of leasehold improvement and equipment are recognised as profit or loss as incurred.

*Depreciation*

Depreciation is calculated based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of each component of an item of assets. The estimated useful lives are as follows:

Leasehold improvements	20 years
Furniture and office equipment	5 years
Computer equipment	5 years

No depreciation is provided on assets under construction.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

**4.7 Intangible Assets**

*Research and development*

Expenditure on research activities, undertaken with the prospect of gaining new scientific or technical knowledge and understanding, is recognised in profit or loss as incurred.

Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalised only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the Company intends to and has sufficient resources to complete development and to use or sell the asset. The expenditure capitalised includes the cost of materials, direct labour, overhead costs that are directly attributable to preparing the asset for its intended use, and capitalised borrowing costs. Other development expenditure is recognised in profit or loss as incurred.

Capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment losses.

*Other intangible assets*

Other intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and accumulated impairment losses (if any).

Intangible assets with indefinite useful life consist of digital assets business licenses which are tested for impairment annually and whenever there is an indication that the intangible assets may be impaired and allowance for impairment is recognised (if any).

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### *Subsequent expenditure*

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

### *Amortisation*

Amortisation is based on the cost of the asset, or other amount substituted for cost, less its residual value.

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives are as follows:

Computer software	5 and 10 years
-------------------	----------------

Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

No amortisation is provided on intangible assets under development.

## **4.8 Lease**

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in TFRS 16.

### *As a lessee*

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date, except for leases of low-value assets and short-term leases which is recognised as an expense on a straight-line basis over the lease term.

Right-of-use asset is measured at cost, less any accumulated depreciation and impairment loss, and adjusted for any remeasurements of lease liability. The cost of right-of-use asset includes the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of restoration costs, less any lease incentives received. Depreciation is charged to profit or loss on a straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. The lease payments included fixed payments less any lease incentive receivable.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in lease term, change in lease payments, change in the estimate of the amount expected to be payable under a residual value guarantee, or a change in the assessment of purchase, extension or termination options. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

### 4.9 Impairment of financial assets

The Company recognises allowances for expected credit losses (ECLs) on financial assets measured at amortised cost (including cash and cash equivalents, trade receivables and other current receivables, loans to others and related parties), debt investments measured at FVOCI, contract assets, lease receivables, and loan commitments issued which are not measured at FVTPL.

#### *Measurement of ECLs*

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

ECLs are measured on either of the following bases:

- 12-month ECLs: these are losses that are expected to result from possible default events within the 12 months after the reporting date; or
- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of a financial instrument.

Loss allowances for trade receivables, lease receivables and contract assets are always measured at an amount equal to lifetime ECLs. ECLs on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both current and forecast general economic conditions at the reporting date.

Loss allowances for all other financial instruments, the Company recognises ECLs equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition or credit-impaired financial assets, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

## GMO-Z.com Cryptonomics (Thailand) Company Limited

### Notes to the financial statements

#### For the year ended 31 December 2024

The Company assumes that the credit risk on a financial asset has increased significantly if it is overdue, significant deterioration in financial instruments's credit rating, significant deterioration in the operating results of the debtor and existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Company.

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is overdue.

Depending on the nature of the financial instruments, the assessment of a significant increase in credit risk is performed on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are evaluated based on shared credit risk characteristics, such as past due status and credit risk ratings.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument's credit risk since initial recognition. Increased in loss allowance is recognised as an impairment loss in profit or loss. Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For debt securities at FVOCI, the Company recognises an impairment loss in profit or loss with the corresponding entry in other comprehensive income.

#### *Credit-impaired financial assets*

At reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence of credit-impairment includes significant financial difficulty, a breach of contract such past due, and the probability the debtor will enter bankruptcy.

#### *Write-off*

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering. Subsequent recoveries of an asset that was previously written off, are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

#### **4.10 Impairment of non-financial assets**

The carrying amounts of the Company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. For goodwill and intangible assets that have indefinite useful lives or are not yet available for use, the recoverable amount is estimated each year at the same time.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. The impairment loss is recognised in profit or loss unless it reverses a previous revaluation credited to equity, in which case it is charged to equity.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### *Calculation of recoverable amount*

The recoverable amount of a non-financial asset is the greater of the asset's value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

### *Reversal of impairment*

Impairment losses recognised in prior periods in respect of other non-financial assets are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

## **4.11 Employee benefit**

### *Defined contribution plan*

Obligations for contributions to defined contribution plans are expensed as the related service is provided.

### *Defined benefit plans*

The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any application minimum funding requirements.

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised immediately in OCI. The Company determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### *Short-term employee benefits*

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

#### **4.12 Provisions**

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance cost.

#### **4.13 Fair value measurement**

‘Fair value’ is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Company’s accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as ‘active’ if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Company measures assets and long positions at a bid price and liabilities and short positions at an ask price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

### For the year ended 31 December 2024

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are based on unobservable input.

If the inputs used to measure the fair value of an asset or liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

#### **4.14 Share capital**

##### *Ordinary shares*

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

#### **4.15 Revenue**

Revenue is recognised when a customer obtains control of the goods or services in an amount that reflects the consideration to which the Company expects to be entitled, excluding those amounts collected on behalf of third parties, value added tax and is after deduction of any trade discounts.

##### *Trading fee*

Revenue from trading fee from digital asset exchange platform is recognized at a point in time when the Company has satisfied its performance obligation to the customer, and recognized based on rate agreed with customers.

##### *Revenue for rendering of services*

Revenue from rendering of services is recognised over time as the services are provided. The stage of completion is assessed based on surveys of work performed. The related costs are recognised in profit or loss when they are incurred.

##### *Commission revenue*

For the contracts that the Company is arranging for the provision of the goods or services on behalf of its customers and does not control the goods or services before the primary sellers or service providers will provide the goods or services to the customers. The Company acts in the capacity of an agent and recognises the net amount of consideration as commission revenue.

## **GMO-Z.com Cryptonomics (Thailand) Company Limited**

### **Notes to the financial statements**

**For the year ended 31 December 2024**

#### **4.16 Other income**

Other income comprises interest income and others and recognised as revenue in profit and loss on accrued basis.

#### **4.17 Income tax**

Income tax expense for the year comprises current and deferred tax. Current and deferred tax are recognised in profit or loss except to the extent that they relate to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Company believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretations of tax law and prior experience. This assessment relies on estimates and assumptions and may involve a series of judgements about future events. New information may become available that causes the Company to change its judgement regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis, or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans for individual subsidiaries in the Company. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### 4.18 Earnings (loss) per share

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held.

### 4.19 Related parties

A related party is a person or entity that has direct or indirect control, or has significant influence over the financial and managerial decision-making of the Company; a person or entity that are under common control or under the same significant influence as the Company; or the Company has direct or indirect control or has significant influence over the financial and managerial decision-making of a person or entity.

## 5 Related parties transactions

## Notes to the financial statements

For the year ended 31 December 2024

### Actuarial assumptions

The following were the principal actuarial assumptions at the reporting date.

	2024	2023
	(%)	
Discount rate	2.82	3.75
Future salary growth rate	6.00	6.00
Employee turnover rate	1.91 - 22.92	1.91 - 22.92

Assumptions regarding future mortality have been based on published statistics and mortality tables 2560 (TMO 2017).

### Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below;

	(in Baht)	
	Increase	Decrease
<b>At 31 December 2024</b>		
Discount rate (1% movement)	(481,306)	598,615
Future salary growth (1% movement)	572,649	(472,324)
Employee turnover (20% movement)	(396,729)	490,993
<b>At 31 December 2023</b>		
Discount rate (1% movement)	(310,135)	382,978
Future salary growth (1% movement)	391,952	(322,280)
Employee turnover (20% movement)	(274,769)	343,264

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

## Notes to the financial statements

For the year ended 31 December 2024

### 23 Financial instruments

#### *Risk management framework*

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the risk management committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's board of directors oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company's board of directors is assisted in its oversight role by risk management committee. Risk management committee undertakes both regular and ad hoc reviews of risk management controls and procedures.

#### *Financial risk management policies*

The Company is exposed to normal business risks from changes in market interest rates, currency exchange rates and digital assets exchange rate, and from non-performance of contractual obligations by counterparties. The Company does not hold or issue derivatives for speculative or trading purposes.

Risk management is integral to the whole business of the Company. The Company has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The management continually monitors the Company's risk management process to ensure that an appropriate balance between risk and control is achieved.

#### *Capital liquidity level maintenance and capital management*

Capital liquidity level maintenance is to maintain capital stability to maintain trust from investor, creditor and market and to sustain the future development of the business. The Office of Securities and Exchange Commission (SEC) governs and requires regularly report submission from digital asset business operators, according to the following notifications;

- Attachment to the notification of the Office of the Securities and Exchange Commission No. GorThor. 19/2561 Re: Rules, Conditions and Procedures for Undertaking Digital Asset Businesses (Summary) which amended by the notification of the Office of the Securities and Exchange Commission No. GorThor. 27/2565 (No.18) and the notification No. GorThor. 29/2567 (No.25) stated that the digital assets business operator that holding more than one type of license and providing custody of customers' asset shall maintain the capital by NC-1 that not less than the highest amount between (1) and (2) of the method as following rules:
  - (1) Minimum fixed capital fund: Not less than 25 million baht.
  - (2) Total amount of (2.1) and (2.2) as following:
    - (2.1) The net liquid capital (NLC) required must be maintained based on the value of custody risk as follows:

## GMO-Z.com Cryptonomics (Thailand) Company Limited

### Notes to the financial statements

#### For the year ended 31 December 2024

(2.1.1) For customer assets that has been kept in hot wallet, requires to maintain the summarized of capital:

- 5% of the portion of customer assets that does not exceed 5% of total customer assets.
- 10% of the portion of customer assets exceeding 5% but not exceeding 10% of total customer assets.
- 100% of the portion of customer assets exceeding 10% of total customer assets.

(2.1.2) For customer assets that has been kept in cold wallet, requires to maintain the summarized of capital:

- 2% of customer assets stored in the operator's own system or with foreign digital asset custodians.

<b>Net exposure</b>	<b>(68,866,233)</b>	<b>(2,696,372)</b>

# GMO-Z.com Cryptonomics (Thailand) Company Limited

## Notes to the financial statements

For the year ended 31 December 2024

### ***Credit risk***

Credit risk is the potential financial loss resulting from the failure of a customer or counterparty to settle its financial and contractual obligations to the Company as and when they fall due.

Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers or counterparty. At the reporting date there were no significant concentrations of credit risk. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position. However, management does not anticipate material losses from its debt collection.

### ***Liquidity risk***

The Company monitors its liquidity risk and maintains a level of cash and cash equivalents deemed adequate by management to finance the Company's operations and to mitigate the effects of fluctuations in cash flows.

### ***Fair value of financial assets and financial liabilities***

The fair value disclosures, considerable judgement is necessarily required in estimation of fair value. Accordingly, the estimated fair value presented here in is not necessarily indicative of the amount that could be realised in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value. The following methods and assumptions were used by the Company in estimating fair values of financial instruments.

### ***Financial instruments not measured at fair value***

Fair value of financial instruments which are not measured at fair value as at 31 December 2024 are summarised as follows:

- Financial asset: cash and cash equivalent, current investment, trade and other current receivables and other non-current financial asset (2023: *cash and cash equivalent, current investment, and other non-current financial asset*) stated at book value which is close to fair value. The valuation techniques and key inputs is net present value of expected cash inflow;
- Financial liabilities: trade and other current payables and short-term loan from related party, (2023: *trade and other current payables, short-term loan from related party, and lease liability*) stated at book value which is close to fair value. The valuation techniques and key inputs is net present value of expected cash outflow.

The fair value measurement is categorised as level 3 in the fair value hierarchy.
